BOOK SYNOPSIS

Daemmrich uses a comparative study of pharmaceutical regulation in the U.S. and Germany to show that in order for medical globalization to be successful, it must accommodate persisting social and political variation even when technical standardization has been achieved. He looks at the relationships among governments, doctors, the pharmaceutical industry, and patients in case studies of an antibiotic, a sedative, a heart medication, a cancer therapy, and an AIDS drug.

PHARMACOPOLITICS DRUG REGULATION IN THE UNITED STATES AND GERMANY STUDIES IN SOCIAL MEDICINE
